Revision of the author's The confident consumer. When Howard B. Wigglebottom starts feeling sad about always getting into trouble at school for not listening, he decides to change his ways. Economic and financial research on insurance markets has undergone dramatic growth since its infancy in the early 1960s. Our main objective in compiling this volume was to achieve a wider dissemination of key papers in this literature. Their significance is highlighted in the introduction, which surveys major

areas in insurance economics. While it was not possible to provide comprehensive coverage of insurance economics in this book, these readings provide an essential foundation to those who desire to conduct research and teach in the field. In particular, we hope that this compilation and our introduction will be useful to graduate students and to researchers in economics, finance, and insurance. Our criteria for selecting articles included significance, representativeness, pedagogical value, and our desire to include theoretical and empirical work. While the focus of the applied papers is on property-liability insurance, they illustrate issues, concepts, and methods that are applicable in many areas of insurance. The S. S. Huebner Foundation for Insurance Education at the University of Pennsylvania's Wharton School made this book possible by financing publication costs. We are grateful for this assistance and to J. David Cummins, Executive Director of the Foundation, for his efforts and helpful advice on the contents. We also wish to thank all of the authors and editors who provided permission to reprint articles and our respective institutions for technical and financial support. Based on an analysis of data from the U.S. National Crime Study, the authors conclude that the personal characteristics associated with risks of victimization were rather stable across the cities surveyed, although levels of victimization showed considerable variation. For example, younger persons had greater rates of personal victimization than did older persons, males than females, etc. The book discusses the patterns of risk factors associated with criminal victimization, and the correlates of characteristics of criminal incidents. Gives helpful forms and information to teach 15-18 year olds how to stay out of debt, how to save for a car, college, your own business and how to give money that will make a difference in the world and more. Written from a Christian perspective. From Grammy-winning pop star Ciara and Super Bowl champion quarterback Russell Wilson comes a picture book to inspire young readers to see the value in themselves, be brave, and go after their biggest dreams! Why not you? Amazing you! You're a winner! You're so strong! You are perfect and important—you and all your gifts belong! We all have big dreams! Sometimes it's hard to imagine our big dreams coming true. But what if someone saw all the amazing and spectacular parts of us—our winning smiles, our fancy feet, our warm hearts—and asked, "Why not you?" Whether it's becoming a football player or a pop star or the president or a scientist: Why not you? In this picture book debut, superstars Ciara and Russell Wilson encourage readers to see themselves achieving their dreams, no matter how outrageous they may seem. It's a lyrical celebration of self-esteem, perseverance, and daring to shoot for the stars. Greenwood Plantation in the Red Hills region of southwest Georgia includes a rare one-thousand-acre stand of old-growth longleaf pine woodlands, a remnant of an ecosystem that once covered close to ninety million acres across the Southeast. The Art of Managing Longleaf documents the sometimes controversial management system that not only has protected Greenwood's "Big Woods" but also has been practiced on a substantial acreage of the remnant longleaf pine woodlands in the Red Hills and other parts of the Coastal Plain. Often described as an art informed by science, the Stoddard-Neel Approach combines frequent prescribed burning, highly selective logging, a commitment to a particular woodland aesthetic, intimate knowledge of the ecosystem and its processes, and other strategies to manage the longleaf pine ecosystem in a sustainable way. The namesakes of this method are Herbert Stoddard (who developed it) and his colleague and successor, Leon Neel (who has refined it). In addition to presenting a detailed, illustrated outline of the Stoddard-Neel Approach, the book—based on an extensive oral history project undertaken by Paul S. Sutter and Albert G. Way, with Neel as its major subject—discusses Neel's deep familial and cultural roots in the Red Hills; his years of work with Stoddard; and the formation and early years of the Tall Timbers Research Station, which Stoddard and Neel helped found in the pinelands near Tallahassee, Florida, in 1958. In their introduction, environmental historians Sutter and Way provide an overview of the longleaf ecosystem's natural and human history, and in his afterword, forest ecologist Jerry F. Franklin affirms the value of the Stoddard-Neel Approach. This book provides readers with essential concepts from financial economics for an integrated study of the financial system and the real economy. It discusses how long-term market prices are determined and affected by population growth, technological progress and non-renewable resources. The meaning of market prices is examined from the perspective of households and from the perspective of firms. The book therefore connects different fields of finance, which usually focus only on either the households' side or the firms' side. Some of the nation's wealthiest philanthropies, including the Bill and Melinda Gates Foundation, the Walton Family Foundation, and the Broad Foundation have invested hundreds of millions of dollars in education reform. With vast wealth and a political agenda, these foundations have helped to reshape the reform landscape in urban education. In *Follow the Money*, Sarah Reckhow shows where and how foundation investment in education is occurring and presents in-depth analysis of the effects of these investments within the two largest urban districts in the United States: New York City and Los Angeles. In New York City, centralized political control and the use of private resources have enabled rapid implementation of reform proposals. Yet this potent combination of top-down authority and outside funding also poses serious questions about transparency, responsiveness, and democratic accountability in New York. Furthermore, the sustainability of reform policies is closely linked to the political fortunes of the current mayor and his chosen school leader. While the media has highlighted the efforts of drastic reformers and dominating leaders such as Joel Klein in New York City and Michelle Rhee in Washington, D.C., a slower, but possibly more transformative, set of reforms have been taking place in Los Angeles. These reforms were also funded and shaped by major foundations, but they work from the bottom up, through charter school operators managing networks of schools. This strategy has built grassroots political momentum and demand for reform in Los Angeles that is unmatched in New York City and other districts with mayoral control. Reckhow's study of Los Angeles's education system shows how democratically responsive urban school reform could occur—pairing foundation investment with

broad grassroots involvement. Bringing a sharp analytical eye and a wealth of evidence to one of the most politicized issues of our day, *Follow the Money* will reshape our thinking about educational reform in America. Wellness entrepreneur and cofounder of *Tone It Up* Karena Dawn opens shares her experience growing up with a paranoid schizophrenic mother and her personal mental health journey in her new memoir, *The Big Silence: A Daughter's Memoir of Mental Illness and Healing*. Hoping to empower others who are dealing with their own mental and emotional problems, Dawn reaches a depth of honesty, truth, power, and emotional gravity that's rarely achieved. This edited volume provides insight into how digital badges may enhance formal, non-formal and informal education by focusing on technical design issues including organizational requirements, learning and instructional design, as well as deployment. It features current research exploring the theoretical foundation and empirical evidence of the utilization of digital badges as well as case studies that describe current practices and experiences in the use of digital badges for motivation, learning, and instruction in K-12, higher education, workplace learning, and further education settings. Scott Seeking his own utmost depth of comprehensive understanding, the author sets out to prove empirically that God exists. The seed of proof is the Birth Paradox, its florescence a faith grounded in his spirituality disposed soul: As empirically real as his conscious self, as mathematically certain as the probability laws of genetic science, as necessary as that the universe requires a creator for its rational possibility, as immanently intuitive as the Divine Allegory he mirrors. The Birth Paradox is the contingency of personal conscious existence on the body. Is there any scientific or commonsense belief as certain of itself? And yet, as a practical proposition, it is an utterly impossible conjunction! Personal consciousness is necessary specific to its own experience, a subtly profound tautology! How is it, then, that one's necessary being can be dependent on a chance body? **NEW YORK TIMES BESTSELLER** • Thought leader, visionary, philanthropist, mystic, and yogi Sadhguru presents Western readers with a time-tested path to achieving absolute well-being: the classical science of yoga. "A loving invitation to live our best lives and a profound reassurance of why and how we can."—Sir Ken Robinson, author of *The Element*, *Finding Your Element*, and *Out of Our Minds: Learning to Be Creative* **NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY SPIRITUALITY & HEALTH** The practice of hatha yoga, as we commonly know it, is but one of eight branches of the body of knowledge that is yoga. In fact, yoga is a sophisticated system of self-empowerment that is capable of harnessing and activating inner energies in such a way that your body and mind function at their optimal capacity. It is a means to create inner situations exactly the way you want them, turning you into the architect of your own joy. A yogi lives life in this expansive state, and in this transformative book Sadhguru tells the story of his own awakening, from a boy with an unusual affinity for the natural world to a young daredevil who crossed the Indian continent on his motorcycle. He relates the moment of his enlightenment on a mountaintop in southern India, where time stood still and he emerged radically changed. Today, as the founder of Isha, an organization devoted to humanitarian causes, he lights the path for millions. The term guru, he notes, means "dispeller of darkness, someone who opens the door for you. . . . As a guru, I have no doctrine to teach, no philosophy to impart, no belief to propagate. And that is because the only solution for all the ills that plague humanity is self-transformation. Self-transformation means that nothing of the old remains. It is a dimensional shift in the way you perceive and experience life." The wisdom distilled in this accessible, profound, and engaging book offers readers time-tested tools that are fresh, alive, and radiantly new. *Inner Engineering* presents a revolutionary way of thinking about our agency and our humanity and the opportunity to achieve nothing less than a life of joy. This product is a complete reference to both classical material and advanced topics that are otherwise scattered in sometimes hard-to-find papers. A major effort in writing the book was made to highlight the intuitions behind the theoretical development. Companies increasingly play a meaningful role in civil society and the philanthropic sector through Corporate Social Responsibility (CSR) and Corporate Philanthropy (CP). The most well studied form of allocating these resources is through outright contributions to operating external foundations and other nonprofit organizations. However, far less is known about the use of corporate foundations, separate and independent nonprofit entities aimed at channeling corporate giving to a social mission related to a company. Corporate foundations are often linked to the founding company through their name, funding, trustees, administration and potential employee involvement. As these

foundations are growing in number, size and importance and becoming increasingly visible in the philanthropic sector, the urgency to understand their role and functioning becomes more important. The primary aim of this volume is to deliver a holistic analysis of the current state-of-the-art on corporate foundations. For that reason, the book includes different perspectives on and use a hybrid concept of corporate foundations. The book includes three main parts. First, looking further into the organizational processes of corporate foundations, the book analyzes governance and operations as major aspects of organizational performance. Second, it sheds light on the role of corporate foundations in various institutional settings. Lastly, the book includes various stakeholder perspectives on corporate foundations, including corporate employees, beneficiaries, and their non-profit partners. By reading the book, readers will build a comprehensive understanding of the role and functioning of corporate foundations, understand new avenues for research and, in case they are practitioners in the field, find practical advice rooted in academic research. In short, *Culture in Minds and Societies: Foundations of Cultural Psychology* presents a new look at the relationship between people and society, produces a semiotic theory of cultural psychology and provides a dynamic treatment of culture in human lives. This book makes a decisive break from the post-modernist theoretical framework that considers knowledge as local and situation-specific. It restores the goal of construction of general knowledge to the social sciences. While recognizing the uniqueness of all human personal experience from birth to death, it emphasizes the universality of cultural organization of human minds and societies. In the fall of 1999, John Doerr met with the founders of a start-up whom he'd just given \$12.5 million, the biggest investment of his career. Larry Page and Sergey Brin had amazing technology, entrepreneurial energy, and sky-high ambitions, but no real business plan. For Google to change the world (or even to survive), Page and Brin had to learn how to make tough choices on priorities while keeping their team on track. They'd have to know when to pull the plug on losing propositions, to fail fast. And they needed timely, relevant data to track their progress—to measure what mattered. Doerr taught them about a proven approach to operating excellence: Objectives and Key Results. He had first discovered OKRs in the 1970s as an engineer at Intel, where the legendary Andy Grove (“the greatest manager of his or any era”) drove the best-run company Doerr had ever seen. Later, as a venture capitalist, Doerr shared Grove's brainchild with more than fifty companies. Wherever the process was faithfully practiced, it worked. In this goal-setting system, objectives define what we seek to achieve; key results are how those top-priority goals will be attained with specific, measurable actions within a set time frame. Everyone's goals, from entry level to CEO, are transparent to the entire organization. The benefits are profound. OKRs surface an organization's most important work. They focus effort and foster coordination. They keep employees on track. They link objectives across silos to unify and strengthen the entire company. Along the way, OKRs enhance workplace satisfaction and boost retention. In *Measure What Matters*, Doerr shares a broad range of first-person, behind-the-scenes case studies, with narrators including Bono and Bill Gates, to demonstrate the focus, agility, and explosive growth that OKRs have spurred at so many great organizations. This book will help a new generation of leaders capture the same magic. Now available for Pre-Order! This book, Understanding Money, is the first in my five part series on personal finance. The goal of this book is to begin to get you thinking about your attitudes and beliefs regarding the basics of personal finance: Money, earning, spending, saving, and investing. In thinking about these topics, you will begin to understand how your beliefs shape your financial behaviors for better or worse. This book is the foundation for all the information and discussion contained in the remaining four books on personal finance topics that you are almost sure to face in your life. Continue your journey through all five books and you'll be certain to Never Make an Uninformed Financial Decision Again. My name is Hayden Burrus. I am a Registered Investment Adviser and founder of Forward Financial Planners, LLC. Each week for several years I have educated and informed readers of TypeZFinance.com on personal finance topics with the goal of enabling readers to manage their finances intelligently without the assistance of a financial adviser. That's right, I am a financial adviser (actually I call myself a Financial Coach) encouraging people to fire their financial adviser! For decades I have been researching financial products and services offered to individuals. During that time I concluded that virtually all of the offers from financial advisers are grossly overpriced compared to do-it-yourself options available to those investors willing to make a modest time investment understanding personal finance. I've met advisers who have stated "I've never met anyone that doesn't need more life insurance". I've met advisers who recommend widely discredited investments that underperform and have expenses 10x as large as the do-it-yourself options. I've met advisers who hide from their clients the fact that they are being paid to recommend financial products. I'VE HAD ENOUGH and I want to help free investors from predatory financial advisers. The second book is titled Starting to Make Money. The goal of this book is to get you thinking about everyday money issues that everyone faces. I talk about car loans, everyday spending and saving decisions and money issues affecting your social life. This book takes the personal finance foundation developed in book one and applies it to the real world. After reading this book you'll be comfortable effectively managing your personal budget. You'll be generating positive cash flow in your life and will be starting down a path that will lead to traditional investing and wealth building. The third book is titled An Adult Relationship with Money. This book is where most personal finance books start. To me, starting with this book is kind of like starting to build a house on the third floor. There's no way you can be successful in managing your taxes, investments, loans, and financial advisers until you have the foundation contained in the first two books. This is the book most similar to traditional personal finance books. The fourth book is titled Now You Have Money. This book discusses financial issues and decisions you'll face if you follow the guidance in the first three books. It discusses retirement investing, annuities, and other issues related to managing a six or seven figure net worth. If you're not in that wealth category yet, you will be soon enough. Just follow the guidance from the first three books. It's great to be ahead of the game and have the piece of mind knowing how to handle your future wealth before you actually have it. The fifth and final book is titled Extra Credit - Money for Fun. This book is the final step of the personal finance journey. Among other things it discusses personal finance issues around being set for life and keeping yourself educated about personal finance. If you're not set for life yet, don't fret. Just follow the guidance in the first four books and be patient. NEVER MAKE AN UNINFORMED FINANCIAL DECISION AGAIN! Looking back at the origins of international climate philanthropy and its evolution over the past three decades, the author examines the role of philanthropic foundations in the international climate debate. The research presented in this book shows that foundations, through their grant-making and convening activities, are at the heart of the climate debate.
