The Screen Design Manual provides designers of interactive media with a practical working guide for preparing and presenting information that is suitable for both their target groups and the media they are using. It highlights background information and relationships, clarifying them with examples, and encourages the further development of the language of digital media. In addition to the basics of perception and learning psychology, ergonomics, communication theory, imagery research, and aesthetics, the book also considers design navigation and orientation elements. Guidelines and checklists, along with the comprehensive design of the book, support the transfer of information into practice. Frank Thissen teaches multimedia didactics and information design at the University of Applied Sciences in Stuttgart. For over 10 years he has been developing computer based training. He has worked for international companies such as Siemens AG and SAP AG. His research project explores the role of emotion in e-learning > www.frank-thissen.de Key Topics: - Interactive media - Text for the screen - Effective use of pictures - Video, animation, and sound - Screen layout - Orientation and navigation - Interaction - Emotions and metamesages - Intercultural communication Le présent ouvrage est le résultat d'une recherche conjointe entre les Universités de Bologne, Rennes et Bruxelles sur le thème de la dimension extérieure de l'espace de liberté, de sécurité et de justice de l'Union européenne (ELSJ). Cette recherche a été soutenue par la Commission européenne dans le cadre de l' Action Jean Monnet. Il associe des professeurs et chercheurs de renom qui conjuguent leurs compétences et situent leur analyse à l'intersection des politiques en la matière et des politiques externes de l'Union européenne. Les auteurs évaluent de manière critique l'impact du traité de Lisbonne et de la pratique de l'Union concernant la dimension extérieure de l'ELSJ. Cette dimension dont l'importance ne cesse de croître oblige l'Union à concilier des impératifs parfois contradictoires entre les objectifs sécuritaires de l'ELSJ ou ceux de l'action extérieure, ou encore avec les valeurs sur lesquelles elle est fondée. Les auteurs tentent de répondre à différentes questions induites par le nouveau système de représentation extérieure de l'Union dans le domaine de l'ELSJ : Quelles sont les retombées juridiques du nouveau système ? Quel est également son impact politique ? Ne risque-t-on pas une incursion croissante de la politique étrangère et de sécurité commune (PESC) dans les aspects sécuritaires de l'ELSJ ? En cours de déploiement dans de nombreux pays, la technologie LTE (Long Term Evolution), aussi connue sous le nom de 4G, représente une évolution majeure dans le domaine des réseaux mobiles. Le LTE constitue le prolongement du GSM (2G) et de l'UMTS/HSPA (3G/3G+), avec pour objectifs : d'accroître les débits offerts aux utilisateurs ; d'augmenter la capacité des réseaux ; d'améliorer l'interactivité grâce à une réduction de la latence. Cet ouvrage propose une synthèse accessible et commentée des spécifications techniques du LIE. Il présente notamment les motivations de cette nouvelle technologie, l'architecture LTE/EPC, les principes techniques et les mécanismes normalisés de l'interface radio, les procédures d'appels et de gestion de la mobilité. Les interactions avec le réseau coeur EPC (Evolved Racket Core) sont également décrites. Des développements sont enfin consacrés aux innovations propres au LIE, telles que les fonctionnalités d'auto-organisation ou encore le support natif des cellules femto. À qui s'adresse cet ouvrage ? Aux ingénieurs télécoms travaillant à la mise en place des réseaux 4G chez les opérateurs et leurs partenaires. Aux chercheurs et ingénieurs de recherche impliqués dans la conception et le développement de solutions LIE. Aux enseignants-chercheurs et étudiants d'écoles d'ingénieurs et de masters universitaires.
