Through strategic use of Fry's Instant Words, students will both improve reading prosody and build important comprehension skills. "Blue Pelican Java" is a somewhat unusual high school computer science textbook. Most computer science texts will begin with a section on the history of computers followed with a flurry of definitions that are just "so many words" to the average student. The approach here is to first give the student some experience upon which to hang the definitions that come later. The usual practice of introducing classes and objects is deferred until the student has a firm grasp of the fundamentals (loops, decision structures, etc). Thus, the beginning student is not overwhelmed by the simultaneous introduction of OOPs and the fundamentals. The book includes plenty of exercises (many in "contest" form), programming projects, and a huge appendix. This book is designed for grades K-2 instruction and provides step-by-step mathematics lessons that incorporate the use of the TI-10 calculator throughout the learning process. The 30 lessons included present mathematics in a real-world context and cover each of the five strands: number and operations, geometry, algebra, measurement, and data analysis and probability. 248pp. plus Teacher Resource CD. How can they grow a strong identity as disciples of Christ and members of his community while still caring for their Muslim families? The 'Come Follow Me' discipleship course was written specifically for new believers from a Muslim background as they start to follow Jesus the Messiah. It comes in two parts, the study guide, which is needed by learners and Advisors, and the Advisor's guide, which is available to download for free from our website come-follow-me.org, or can be ordered from the Come Follow Me online shop. Come Follow Me is based on an inductive study of 1 Peter, and participants grow through a powerful combination of self-study, regular discussion with a mentor (or in a group) and practical learning tasks. It aims for deep-level discipleship, which affects issues of belonging (e.g. to old and new communities), worldview (including fatalism, revenge, good deeds etc) and behaviour (e.g. marriage relationships, conflict resolution). Ideal for students mastering a growing content-area vocabulary in social studies, science, and mathematics multisyllabic Greek- and Latin-based words help students unlock the meanings of literally thousands of words.
