CRACK99: The Takedown of a \$100 Million Chinese

Software Pirate Sep 21 2019 The utterly gripping story of the most outrageous case of cyber piracy prosecuted by the U.S. Department of Justice. A former U.S. Navy intelligence officer, David Locke Hall was a federal prosecutor when a bizarre-sounding website, CRACK99, came to his attention. It looked like Craigslist on acid, but what it sold was anything but amateurish: thousands of high-tech software products used largely by the military, and for mere pennies on the dollar. Want to purchase satellite tracking software? No problem. Aerospace and aviation simulations? No problem. Communications systems designs? No problem. Software for Marine One, the presidential helicopter?

No problem. With delivery times and customer service to rival the world's most successful e-tailers, anybody, anywhere—including rogue regimes, terrorists, and countries forbidden from doing business with the United States—had access to these goods for any purpose whatsoever. But who was behind CRACK99, and where were they? The Justice Department discouraged potentially costly, risky cases like this, preferring the low-hanging fruit that scored points from politicians and the public. But Hall and his colleagues were determined to find the culprit. They bought CRACK99's products for delivery in the United States, buying more and more to appeal to the budding entrepreneur in the man they identified as Xiang Li. After winning his confidence, they lured him to Saipan—a U.S. commonwealth territory where Hall's own father had stormed the beaches with the marines during World War II. There they set up an audacious sting that culminated in Xiang Li's capture and imprisonment. The value of the goods offered by CRACK99? A cool \$100 million. An eye-opening look at cybercrime and its chilling consequences for national security, CRACK99 reads like a caper that resonates with every amazing detail.

Roman Bathing in Coriovallum Nov 04 2020 'Dit

wetenschappelijke rapport is het resultaat van een grootschalig onderzoeksproject dat tussen 2016 en 2019 is uitgevoerd in het Thermenmuseum in Heerlen. Centraal stond het Romeinse publieke badhuis van Coriovallum - het hedendaagse Heerlen - en haar inbedding in de Romeinse stad. De resultaten van het onderzoek van meer dan 20 archeologische specialisten worden in deze bundel gepresenteerd. Het onderzoek heeft een schat aan nieuwe informatie opgeleverd, niet alleen wat betreft het badhuis en hoe dit functioneerde door de tijd heen, maar ook wat betreft Coriovallum als kleine provinciestad op een steenworp afstand

van de limes in Germania Inferior. Duidelijk is geworden dat het publieke badhuis van Coriovallum bijna 400 jaar een centrale rol in de stad heeft gespeeld'.-- Uitgever Rijksdienst voor het Cultureel Erfgoed.
