This volume brings together contributions that explore the increasingly important roles that English plays in Asia, including its contribution to economic growth, national imaginaries and creative writing. These are issues that are political in a broad sense, but the diversity of Asian contexts also means that the social, political and cultural ramifications of the spread of English into Asia will have to be understood in relation to the challenges facing specific societies. The chapters in the book collectively illustrate this diversity by focusing on countries from South Asia, Southeast Asia and the Asia Pacific. Each country has two contributions devoted to it: one paper provides an overview of the country's language policy and its positioning of English, and another provides a critical discussion of creative expressions involving the use of English. Taken together, the papers in the volume detail the most recent developments concerning the politics of English in Asia.

"The Dynamics Of Ideas That Create History" Orbit-shifting innovation happens when an area that needs transformation meets an innovator with the will and the desire to create, and not follow, history. At the heart of every orbit-shifting innovation is the breakthrough that achieves a transformative impact. Businesses, social enterprises and even governments need orbit-shifting ideas to create a transformative impact. But how does that ground breaking idea come about, and what translates it into actuality? Charting the vast global landscape of orbit-shifting innovation and using unique examples from prominent businesses, the social sector, entrepreneurs and public services - spread across US, UK, Europe, Africa and Asia - the authors build insight into the key drivers behind taking on a transformative challenge and provide a unique framework to navigate the pitfalls and challenges in making it happen. Orbit-shifting innovation empowers everyone to overcome the obstacles to innovation and provides the tools to maximize the impact of transformative change. The inspirational examples and tools for success compel leaders and entrepreneurs to not only pursue impossible challenges but lead the successful journey from conception of an orbit-shifting idea to actually creating history. In the 1990s a newspaper revolution began blowing across northern and central India. In these Hindi-speaking states, when literacy levels rose, communications expanded, and purchasing power climbed, Hindi newspapers followed-picking up readers in small towns and villages. Even while these newspapers surged to the top of national readership charts, they localised furiously in the race for readers. But in this universe of local news, questions arose about what localisation was doing to regional identity and consciousness. Using notes from her pioneering field-study in eight states, Sevanti Ninan brings alive India's ongoing rural newspaper revolution, and its impact on politics, administration and society. Set against the socio-economic and political changes in the countryside, it is a

remarkable story of how journalism flowered in unexpected and unorthodox ways, and colourful media marketing unfurled in the Hindi heartland. Understanding World Media Understanding World Media sets out to mirror world media and the freedom it enjoyed across the globe in about 200 countries. While media is an important part of academic research, concerns have been raised globally on its content, intent and freedom of expression. To the extent that even as per the data compiled by Reporters Without Borders, democratic India ranks below par at 138 in the World Press Freedom Index 2018 out of the 180 listed nations. Though, it is a question of debate and discussions to what extent media in India is considered free or under censorship. When India is emerging as a global power with over 55 percent of its population is under 35 years of age, interest in the world community and media is growing leaps and bounds. It is in this context that this book magnifies its mirror to bring facts about the status and understanding of media in the world. For any book like this, it will always have its challenges to cover subjects like media in a nutshell, but for today, this book is timely and relevant. It is a balanced and thoughtful effort to present such a comprehensive book in a crisp and concise manner, as it is difficult to get experts on various countries to write on their respective domains. We have put our utmost effort to consolidate all necessary information and analysis required for this collection and we are very hopeful that it will serve its purpose, fulfill the void and information gap about the world media. Understanding World Media is structured around two clear themes, the status of media in various countries and its freedom of expression. It is divided into five parts covering vast geographical areas in Asia, Europe, the Americas, Africa and Australia-Oceania. Contains selections from Hindi newspapers with English translations. Caricaturing Culture in India is a highly original history of political cartoons in India. Drawing on the analysis of newspaper cartoons since the 1870s, archival research and interviews with prominent Indian cartoonists, this ambitious study combines historical narrative with ethnographic testimony to give a pioneering account of the role that cartoons have played over time in political communication, public discourse and the refraction of ideals central to the creation of the Indian postcolonial state. Maintaining that cartoons are more than illustrative representations of news, Ritu Gairola Khanduri uncovers the true potential of cartoons as a visual medium where memories jostle, history is imagined and lines of empathy are demarcated. Placing the argument within a wider

context, this thought-provoking book highlights the history and power of print media in debates on free speech and democratic processes around the world, revealing why cartoons still matter today. Although practice theory has been a mainstay of social theory for nearly three decades, so far it has had very limited impact on media studies. This book draws on the work of practice theorists such as Wittgenstein, Foucault, Bourdieu, Barth and Schatzki and rethinks the study of media from the perspective of practice theory. Drawing on ethnographic case studies from places such as Zambia, India, Hong Kong, the United States, Britain, Norway and Denmark, the contributors address a number of important themes: media as practice; the interlinkage between media, culture and practice; the contextual study of media practices; and new practices of digital production. Collectively, these chapters make a strong case for the importance of theorising the relationship between media and practice and thereby adding practice theory as a new strand to the study of anthropology of media.
