Damsels and Divas May 19 2021 2020 Best Early Career Research Monograph, Monash University Malaysia Damsels and Divas investigates the meanings of Europeanness in Hollywood during the 1920s by charting professional trajectories of three movie stars: Pola Negri, Vilma Bánky and Jetta Goudal. It combines the investigation of American fan magazines with the analysis of studio documents, and the examination of the narratives of their films, to develop a thorough understanding of the ways in which Negri, Bánky and Goudal were understood within the realm of their contemporary American culture. This discussion places their star personae in the context of whiteness, femininity and Americanization. Every age has its heroines, and they reveal a lot about prevailing attitudes towards women in their respective eras. In the United States, where the stories of rags-to-riches were especially potent, stars could offer models of successful cultural integration.

**Positioning the Brand** Dec 14 2020 Positioning is hot. Not only in the realm of consumer goods manufacturers, but also for other companies, institutions, governments and even individual persons. An explosion of good quality products on the market and targeted media and advertising campaigns has led to an increasing interest from organizations as to how to strategically position their brand. Up to now, only a few books on positioning were published. *Positioning the Brand* picks up the gauntlet with an approach based on two fundamental choices: Firstly, the book was written from the perspective of the brand manager, and has therefore been shaped as a practical roadmap. Secondly, this book advocates a new stance on positioning, teaching the reader to look from the inside-out, instead of adopting the usual outside-in methodology. This inside-out approach departs from an analysis of the corporate identity, enabling better fulfilment of external positioning, and ensuring internal support. This book is intended for (future) managers, marketing professionals and communication professionals responsible for the commercial success and reputation of a brand. The contents have a practical set-up, reinforced by engaging examples, and enable the reader to individually complete a positioning process.

*Producing Predators* Dec 02 2019 In *Producing Predators*, Michael D. Wise argues that contestations between Native and non-Native people over hunting, labor, and the livestock industry drove the development of predator eradication programs in Montana and Alberta from the 1880s onward. The history of these anti-predator programs was significant not only for their ecological effects, but also for their enduring cultural legacies of colonialism in the Northern Rockies. By targeting wolves and other wild carnivores for extermination, cattle ranchers disavowed the predatory labor of raising domestic animals for slaughter, representing it instead as productive work. Meanwhile, federal agencies sought to purge the Blackfoot, Salish-Kootenai, and other indigenous peoples of their so-called predatory behaviors through campaigns of assimilation and citizenship that forcefully privatized tribal land and criminalized hunting and its related ritual practices. Despite these colonial pressures, Native communities resisted and negotiated the terms of their dispossession by representing their own patterns of work, food, and livelihood as productive. By exploring predation and production as fluid cultural logics for valuing labor, rather than just a set of biological processes, *Producing Predators* offers a new perspective on the history of the American West and the modern history of colonialism more broadly.

*The Rise of the Chinese Consumer* Feb 13 2021 In this book Jonathan Garner and his colleagues at Credit Suisse First Boston, argue that by 2014 the Chinese consumer will likely have displaced the US consumer as the engine of growth in the global economy. Government policy is rebalancing demand within the Chinese economy from investment spending to consumption spending. Strong trend economic growth over the cycle, a rise in the consumption to GDP ratio and steady exchange rate appreciation will likely generate an 18% compound annual growth rate in the US dollar value of Chinese consumption spending over the next ten years and lead to a quadrupling in China's share of global consumption spending. In order to identify the companies and brands which are best placed to succeed in China's rapidly developing mass consumer market, Garner and his colleagues discuss the results of the first comprehensive survey of consumer attitudes and preferences to have been conducted in China, covering 2,700 persons in eight major

Chinese cities. This survey provides valuable data for the business executive or academic seeking detailed local information on sectors including automobiles, beverages, electronic goods, financial services, food producers, food retail, food services, household & personal care, luxury goods, telecommunication equipment, tobacco, and transport and leisure travel. "China is likely to be the single most important influence on the fortunes of investors and corporates alike over the next five years, and yet little is known of what motivates and drives the Chinese consumer. By canvassing the people that matter and reflect the changing face of this massive country, Jonathan Garner has provided investors with a unique insight." Philip Ehrmann, Head of Pacific & Emerging Markets, Gartmore Investment Management Plc.

Lemon-Aid Used Cars and Trucks 2009-2010 Nov 24 2021 For the first time in one volume, Phil Edmonston, Canada's automotive "Dr. Phil," covers all used vehicles, packing this guide with insider tips to help the consumer make the safest and cheapest choice possible from cars and trucks of the past 25 years.

*Lemon-Aid Used Cars and Trucks 2012-2013* Mar 17 2021 Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. U.S. automakers are suddenly awash in profits, and South Koreans and Europeans have gained market shares, while Honda, Nissan, and Toyota have curtailed production following the 2011 tsunami in Japan. Shortages of Japanese new cars and supplier disruptions will likely push used car prices through the roof well into 2012, so what should a savvy

buyer do? The all-new Lemon-Aid Used Cars and Trucks 2012-2013 has the answers, including: More vehicles rated, with some redesigned models that don't perform as well as previous iterations downrated. More roof crash-worthiness ratings along with an expanded cross-border shopping guide. A revised summary of safety- and performance-related defects that are likely to affect rated models. More helpful websites listed in the appendix as well as an updated list of the best and worst "beaters" on the market. More "secret" warranties taken from automaker internal service bulletins and memos than ever.
