The Sixth Edition of a classic in organic chemistry continues its tradition of excellence. Now in its sixth edition, March's *Advanced Organic Chemistry* remains the gold standard in organic chemistry. Throughout its six editions, students and chemists from around the world have relied on it as an essential resource for planning and executing synthetic reactions. The Sixth Edition brings the text completely current with the most recent organic reactions. In addition, the references have been updated to enable readers to find the latest primary and review literature with ease. New features include: More than 25,000 references to the literature to facilitate further research; Revised mechanisms, where required, that explain concepts in clear modern terms; Revisions and updates to each chapter to bring them all fully up to date with the latest reactions and discoveries; A revised Appendix B to facilitate correlating chapter sections with synthetic transformations; Reviews all subjects covered on the exam, presents study and test-taking tips, and provides three diagnostic and three practice tests. Give students a robust conceptual foundation while building critical problem-solving skills.

Robinson/McMurry/Fay's *Chemistry*, known for a concise and united author voice, conceptual focus, extensive worked examples, and thoroughly constructed connections between organic, biological, and general chemistry, highlights the application of chemistry to students' lives and careers. Lead author Jill Robinson strengthens the student orientation by creating more engaging, active learning opportunities for students and faculty. With the 8th Edition, Robinson draws upon her exceptional teaching skills to provide new interactive experiences that help identify and address students' preconceptions. The seventh edition of *General Chemistry* continues the tradition of presenting only the material that is essential for a one-year general chemistry course. It strikes a balance between theory and application by incorporating real-world examples; helping students visualize the three-dimensional atomic and molecular structures that are the basis of chemical activity; and developing problem-solving and critical thinking skills. Although the seventh edition incorporates many impressive features, such as conceptual idea review, animations correlated to the text, and hand-drawn worked examples, *General Chemistry* is still 200 to 300 pages shorter and much less expensive than other two-semester textbooks.

Dr. Chang and Dr. Goldsby's concise-but-thorough approach will appeal to efficiency-minded instructors and value-conscious students. This solutions manual accompanies the 7th edition of *Inorganic Chemistry* by Mark Weller, Tina Overton, Jonathan Rourke and Fraser Armstrong. As you master each chapter in *Inorganic Chemistry*, having detailed solutions handy allows you to confirm your answers and develop your ability to think through the problem-solving process.

Unlike many texts on this subject, it is clear and concise, punctuated with practical and familiar examples from students' personal experiences. An exceptional balance of chemical concepts explains the quantitative aspects of chemistry, and provides deeper insight into theoretical chemical principles. It also sets itself apart by requiring students to master concepts before they can move on to the next chapter. The Seventh Edition focuses on making connections between General, Organic, and Biological Chemistry with a number of new and updated features-including all-new Mastering Reactions boxes, new and updated Chemistry in Action boxes (formerly titled Applications), new and revised chapter problems that strengthen the ties between major concepts in each chapter and practical applications, and much more. 032175011X / 9780321750112 Fundamentals of General, Organic, and Biological Chemistry with MasteringChemistry® Package consists of: 0321750837 / 9780321750839 Fundamentals of General, Organic, and Biological Chemistry 0321776461 / 9780321776464 MasteringChemistry® with Pearson eText -- Access Card -- for Fundamentals of General, Organic, and Biological Chemistry Unforeseen events occurred in the world since the publication of the third edition of Chemistry of Hazardous Materials. They include the intentional use by terrorists of hazardous materials capable of killing or severely harming large segments of the civilized population. These traumatic incidents have caused emergency responders to address special ways of effectively reducing the impact of a terrorist act. For this reason, in this fourth edition, I introduce the hazardous materials likely to be encountered when terrorists use destructive materials. I identify these materials and the properties that cause them to be hazardous and suggest ways of effectively responding when they are encountered. I also exercise a certain degree of care when discussing them. For obvious reasons, I intentionally avoid reporting on the manners by which they can be produced. As in earlier editions of this book, I continue to emphasize the hazardous materials regulations promulgated by the Occupational Safety and Health Administration, the U.S. Department of Transportation, and the Environmental Protection Agency. In this edition, I have updated the regulations to reflect changes that have occurred since publication of the third edition. I have worked to make this fourth edition more comprehensive and easier for nonscientists to learn and understand. To do so, I crafted

performance goals so students are apprised up front of what they should learn in each section. I have also listed the names of chemical substances under each formula in every equation so students can more readily comprehend the relevant chemical change. I also constructed new Solved Exercises and Review Exercises, and I expanded the glossary to include the definitions of new technical terms and phrases in use by emergency responders. During the preparation of this book, I have considered the advice of several individuals. For the combination of their comments, I am extremely grateful. Sincerest thanks are due to the following individuals who, despite their heavy responsibilities and workloads, found the time to provide careful reviews and critiques of the entire manuscript or selected chapters thereof: John M. Eversole, Chicago Fire Department (retired), Chicago, Illinois; Gerald LaFlamme, Quinsigamond Community College, Worcester, Massachusetts, and Chief, Shrewsbury Fire Department, Shrewsbury, Massachusetts; Jeffrey T. Lindsey, Estero Fire Rescue, Estero, Florida; Chris Hawley, Baltimore County Fire Department, Baltimore, Maryland; Gary Kistner, San Antonio College, San Antonio, Texas; James F. Ross, Mercer County Community College, Trenton, New Jersey; and Donald L. Walsh, Chicago Fire Department, Chicago, Illinois. Special thanks are also due to Ms. Katrin Beacom, Senior Editor, and Ms. Kierra Kashickey, Editorial Assistant, Prentice Hall/Brady, for their assistance and input during preparation of the manuscript. A big thank you to the copy editor, Ms. Kristin Landon, and the project manager, Ms. Penny Walker, whose tireless efforts converted the manuscript into this book. Finally, as with the preceding editions, I extend an extra special thank you to my wife, Phyllis, for her critical review of the manuscript and her support throughout the hours needed to complete this project. Her constant love, never-ending encouragement, and patience have always influenced my writing. To her, I dedicate this fourth edition.
