The influence of international courts is ubiquitous, covering areas from the law of the sea to international criminal law. This judicialization of international law is often lauded for bringing effective global governance, upholding the rule of law, and protecting the right of individuals. Yet at what point does the omnipresence of the international judiciary shackle national sovereign freedom? And can the lack of political accountability be justified? Follesdal and Ulfstein bring together the crème de la crème of the legal academic world to ask the big questions for the international judiciary: whether they are there for mere dispute settlement or to set precedent, and how far they can enforce international obligations without impacting on democratic self-determination. 1. economic security, health and well-being. Young adults are key contributors to the nation's workforce and military services and, since many are parents, to the healthy development of the next generation. Although 'millennials' have received attention in the popular media in recent years, young adults are too rarely treated as a distinct population in policy, programs, and research. Instead, they are often grouped with adolescents or, more often, with all adults. Currently, the nation is experiencing economic restructuring, widening inequality, a rapidly rising ratio of older adults, and an increasingly diverse population. The possible transformative effects of these features make focus on young adults especially important. A systematic approach to understanding and responding to the unique circumstances and needs of today's young adults can help to pave the way to a more productive and equitable tomorrow for young adults in particular and our society at large. Investing in The Health and Well-Being of Young Adults describes what is meant by the term young adulthood, who young adults are, what they are doing, and what they need. This study recommends actions that nonprofit programs and federal, state, and local agencies can take to help young adults make a successful transition from adolescence to adulthood. According to this report, young adults should be considered as a separate group from adolescents and older adults. Investing in The Health and Well-Being of Young Adults makes the case that increased efforts to improve high school and college graduate rates and education and workforce development systems that are more closely tied to high-demand economic sectors will help this age group achieve greater opportunity and success. The report also discusses the health status of young adults and makes recommendations to develop evidence-based practices for young adults for medical and behavioral health, including preventions. What happens during the young adult years has profound implications for the rest of the life course, and the stability and progress of society at large depends on how any cohort of young adults fares as a whole. Investing in The Health and Well-Being of Young Adults will provide a roadmap to improving outcomes for this age group as they transition from adolescence to adulthood.

2014 Islamic State launched an astonishing blitzkrieg which saw them seize control of an area in the Middle East the size of Britain. The news was soon filled with their relentless acts of savagery, yet nobody seemed to know who they were or where they'd come from. Now BBC reporter Andrew Hosken delivers the inside story on Islamic State. Through extensive first-hand reporting, Hosken builds a comprehensive picture of IS, their brutal ideology and exterminationist methods. Equally compelling and horrifying, *Empire of Fear* reveals how Islamic State came to be, explores how they might be defeated and asks a frightening question – if they were brought down, could we stop another group emerging to replace them? The second book in an important biennial series that provides a new framework for measuring the inclusive wealth of nations. The 2015 edition of the *Global Burden of Armed Violence* provides a wealth of data relevant to security and the post-2015 sustainable development framework. It estimates that 508,000 people died violently - in both conflict and non-conflict settings - every year in 2007–12, down from 526,000 in 2004–09. This trend is visible in non-conflict settings, where the proportion of women and girls is also slightly reduced, from 17 to 16 per cent. Yet, the number of direct conflict deaths is on the rise: from 55,000 to 70,000 per year over the same periods. Firearms are used in close to half of all homicides committed and in almost one-third of direct conflict deaths. Nearly USD 2 trillion in global homicide-related economic losses could have been saved if the homicide rate in 2000–10 had been reduced to the lowest practically attainable levels - between 2 and 3 deaths per 100,000 population. As per the norms of Right of Children to Free and Compulsory Education (RTE) Act 2009, the Ministry of Human Resource Development, Government of India has made it compulsory to qualify State Level T.E.T (Teachers Eligibility Test) even to qualify as a teacher at an elementary level. Considering the significance of all eligibility tests at State level or Central level, I have brought this unique book for all the aspirants which will help them immensely to perform well in the CTET/State TET exams. This Book - CTET & TETs - Child Development and Pedagogy Paper 1 & 2 contains an insight about each and every concept with detailed notes and explanation on the same. It also covers Previous Year Question Papers with answers from CTET Paper 1 & Paper 2 (2011–2019). This book will help you in understanding and all the key concepts and kind of questions expected in CTET & other State TETs. This book is also useful for KVS/NVS aspirants, B.Ed. Students, Grade XI students, teachers and anyone who is interested in psychologists, theories, pedagogy concepts, concepts on child development etc. This book has been designed in such a way that learners with minimum English language skills will also comprehend the concepts. The book will definitely help you understand each and every concept very clearly and to get extraordinary score in CTET and other TETs in your first attempt itself. Analyses Muslim-Muslim divisions within northern Nigeria, which are as important for understanding the violence in the region as those between Muslim and Christian (for which, see the companion volume, *Creed and Grievance*), with consequences for long-term peacemaking This book looks both backward and forward with regard to the European Union's political strategies towards its neighbouring countries. By bringing together the perspectives of critical geopolitics, policy studies and border studies, it presents a comprehensive review of the European Neighbourhood Policy and how it impacts the ongoing construction of the EU's external frontiers. Is the EU committed to promoting integration in a 'wider' European space, or is a "fortress Europe" emerging where the strengthening of internal cohesion is coupled with the militarisation of its external borders? The book aims to problematize this question by showing how the EU's external policies are based on a mixture of openness and closure, inclusion and exclusion, cooperation and securitisation. The European Neighbourhood Policy is a controversial strategy where regionalization and bordering, homogenisations and differentiations, centrifugal and centripetal forces proceed side-by-side, in

an explicit attempt to construct a selective, mobile and fragmented border. A specific focus is devoted to the diversity of geo-strategies the EU is pursuing in its neighbouring countries and regions, macro-regional strategies and cross-border cooperation initiatives as new scales of cooperation, and the role of other global players. This accessible core text to child development is for students of degrees and foundation degrees in Early Years, Early Childhood Studies and related disciplines and for early years practitioners. It introduces the context of child development, how we can develop an understanding of this development and how early years practitioners can support this in practice. This new Third Edition has been updated throughout and brought into line with current policy. It references the 2014 Special Educational Needs Code of Practice and the new Early Years Teacher status. Other updates to this edition include: a new chapter on critiquing the assessment of school readiness - increasingly a topical theme in the Early Years new information and discussion of the differences between the EYFS and the first Key Stage of the National Curriculum new case studies and enhanced interactive activities. The crisis in Europe is often discussed as a crisis of European integration or a crisis of national economies within Europe. Both the 'methodological Europeanism' and 'methodological nationalism' miss out the important links between economic and political processes at different spatial scales within Europe, and therefore, asymmetries and phenomena of uneven development. In addition, a discussion of possible scenarios which systematically addresses the implications of anti-crisis policies is missing. This volume seeks to close this gap by systematically integrating the analysis of economic policy or 'technical' solutions to the crisis within a broader framework of political economy. It argues that combining critical political economy approaches and post-Keynesian perspectives allows for a systematic understanding of the economic and political dimensions of the crisis. Although both approaches have the capacity to deal with asymmetries and uneven development, the heterogeneity in Europe has been an often largely neglected dimension of analysis. However, this recent crisis has shown that this is an essential dimension which has to be addressed in order to better understand the dynamics of European development and integration. Hence, this book aims to deal with asymmetries in Europe and to bridge the gap between the two perspectives. This work will initiate an integrative debate that is crucial for a deeper understanding of the current crisis and is an important resource for all students and scholars of IPE, European political economy and European politics.

"This is a remarkable, much-needed book that fills a significant gap in the health and social care literature in the early decades of the 21st century—public, global, clinical, ecological. It is powerful, ambitious, comprehensive, and sweeping at the same time that it is visionary, focused, and deep. Its power and passion are about the potential of population health and well-being optimally applied around the globe to help in creating a world that is healthier, safer, more just, and more sustainable." —Barbara K. Rimer, DrPH, Alumni Distinguished Professor and Dean UNC Gillings School of Global Public Health,

University of North Carolina at Chapel Hill (From the Foreword) Drawing on current research and the expertise of world-recognized leaders in public, global, clinical, and social health in both developed and developing nations, this book delivers an evidence-based examination of 21st-century challenges in global population health and well-being. With special attention given to major initiatives of the United Nations, especially its Sustainable Development Goals (SDGs) 2016–2030, and the priorities of the World Health Organization (WHO) and the World Bank, Dr. Lueddeke articulates an imperative to adopt a “One World, One Health” view that recognizes the interdependence of humans, animals, plants, and the environment. The book/text promotes innovative and transformative paradigms for global public health practice, curricula, workforce training, and leadership. Intended for undergraduate and postgraduate courses in global public health, it will also be a welcome addition to the libraries of practitioners and policy-makers at all levels in the public/population/global health continuum. **KEY CONTENT AREAS INCLUDE:** The historical context of public health from early medicine to present day Exemplary educational initiatives: WHO education guidelines; curriculum commentaries from China, South Africa, and Cuba; a proposed Global Framework for Public Health Services and Functions; and case studies from South America (PAHO/ WHO), India (IPHF), and South Africa (PHASA) The changing roles and educational expectations of public and global health professionals in the early decades of the 21st century The complex interdependence of natural, socioeconomic, and political systems at local, national, regional, and global levels The causes of interstate conflicts and longer-term challenges Leading change in a new era, transforming mind-sets, and improving and sustaining the health and well-being of the planet and its people An epilogue on global health, governance, and education with contributions from a think tank of 35 practitioners from 27 nations Supplemental materials, including text aims and objectives and a guide to research and learning resources developed by experts in the United States, Brazil, and the Netherlands, are available as digital downloads **ALSO HIGHLIGHTED:** 65 profiles of leading global health (and health-related) organizations 15 profiles of highly recognized schools and institutes of public health From bank bailouts to austerity, Europe's and Ireland's response to the economic crisis has been engineered specifically to shift the burden of paying for the crisis onto ordinary citizens while investors, financiers, bankers and the privileged are protected. The authors expose the class-based nature of Ireland's crisis resolution. The concept of compliance of World Trade Organization (WTO) law as part of international economic law is examined in this discerning book. The issue of compliance is examined through a broad perspective, considering the key conceptual issues which continue The Ukrainian crisis that dominated headlines in fall 2013 was decades in the making. Two great schisms shaped events: one within Ukraine, its western and southeastern parts divided along cultural and political lines; the other was driven by geopolitical factors. Competition between Russia and the West exacerbated Ukraine's divisions. This study focuses on the historical background and complex causality of the crisis, from the rise of mass demonstrations on Kiev's Maidan Nezalezhnosti (Independence Square) to the making of the post-revolt regime. In the context of a "new cold war," the author sheds light on the role of radical Ukrainian nationalists and neofascists in the February 2014 snipers' massacre, the ouster of President Viktor Yanukovich, and Russia's seizure of Crimea and involvement in the civil war in the eastern region of Donbass. Despite the Australian Constitution implying school education to be a state responsibility, the Commonwealth has increasingly interfered with state school education. The Australian Government Muscling in on School Education therefore offers a historical account of this government involvement in Australian education, from federation to the present day, providing a much-needed, fully updated and relevant overview the topic. Arguing that education has become an arena for competing political forces, this book examines the powerful influence of the Commonwealth over education and the political motives behind it, exploring how politics influences aspects of the curriculum, teaching standards, assessment and reporting, funding, teacher selection and policy more broadly. Ultimately questioning whether this influence is in the interests of the members of the community who depend on education, the book holds government engagement in education to account. Taking the major epochs of federalism as an organizing framework, the book's chapters include explorations of: The efficiency dynamic and the progressive years (1919–39) Postwar imperatives and the Menzies years (1949–72) Coordinative federalism and treading softly: the Whitlam years (1972–5) and Fraser years
