THE seminal study of the Allied large scale airdrops of the Second World War in the European Theater. "The first combat airborne missions in history were flown by the Germans in 1940. Recognizing the possibilities of such operations, the British and Americans followed suit. The first British mission was flown in February 1941, and the first American mission was flown from England to Oran, Algeria, on 8 November 1942 as part of the Anglo-American invasion of North Africa. Other, later missions, principally in the Mediterranean region, provided the American troop carriers with an apprenticeship in airborne warfare. However, until the summer of 1944 no force larger than a reinforced regimental combat team was flown into action in any Allied mission. In World War II the only Allied airborne operations employing more than one division took place in the invasion of Normandy, the unsuccessful attempt to win a bridgehead across the Rhine at Arnhem, and the successful crossing of the Rhine at Wesel. Consequently the study of airborne missions in the European Theater of Operations is of particular importance for the light it throws on the planning and performance of large-scale airborne assaults." The long-awaited new edition of the acclaimed, first-ever comprehensive, informative, and entertaining history of Eastern Europe in English?thoroughly updated, with a major new section on the postcommunist era and a foreword by BBC Central Europe Correspondent Nick Thorpe. When the legendary Romulus killed his brother Remus and founded the city of Rome in 753 BCE, Plovdiv--today the second-largest city in Bulgaria--was thousands of years old. Indeed, London, Paris, Berlin, Vienna, Madrid, Brussels, Amsterdam are all mere infants compared to Plovdiv. This is just one of the paradoxes that haunts and defines the New Europe, that part of Europe that was freed from Soviet bondage in 1989, and which is at once both much older than the modern Atlantic-facing power centers of Western Europe while also being much younger than them. Eastern Europe! is a brief and concise (but informative) introduction to Eastern Europe and its myriad customs and history. Even those knowledgeable about Western Europe often see Eastern Europe as terra incognita, with a sign on the border declaring "Here be monsters." Tomek Jankowski's book is a gateway to understanding both what unites and separates Eastern Europeans from their Western brethren, and how this vital region has been shaped by but has also left its mark on Western Europe, Central Asia, the Middle East, and North Africa. It is a reader-friendly guide to a region that is all too often mischaracterized as remote, insular, and superstitious. The book comprises three parts, The first sums up modern linguistic, geographic, and religious contours of Eastern Europe, while the second, main part delves into the region's history, from the earliest origins of Europe up to the end of the Cold War, as well as--new to the 2nd edition--a section on the post-Cold War period. Closing the book is a section that

makes sense of geographical name references -- many cities, rivers, or regions have different names -- and also includes an Eastern Europe by Numbers feature that provides charts describing the populations, politics, and economies of the region today. Throughout are boxed-off anecdotes (Useless Trivia) describing fascinating aspects of Eastern European history or culture. The quasi-federal European Union stands out as the major exception in the thinly institutionalized world of international politics. Something has led Europeans--and only Europeans--beyond the nation-state to a fundamentally new political architecture. Craig Parsons argues in *A Certain Idea of Europe* that this "something" was a particular set of ideas generated in Western Europe after the Second World War. In Parsons's view, today's European Union reflects the ideological (and perhaps visionary) project of an elite minority. His book traces the progressive victory of this project in France, where the battle over European institutions erupted most divisively. Drawing on archival research and extensive interviews with French policymakers, the author carefully traces a fifty-year conflict between radically different European plans. Only through aggressive leadership did the advocates of a supranational "community" Europe succeed at building the EU and binding their opponents within it. Parsons puts the causal impact of ideas, and their binding effects through institutions, at the center of his book. In so doing he presents a strong logic of "social construction"--a sharp departure from other accounts of EU history that downplay the role of ideas and ideology. In this important new introductory textbook, José Magone provides an accessible and comprehensive introduction to contemporary European politics. The unification of the European continent since the Fall of the Berlin wall in 1989 and the collapse of communist regimes in Central and Eastern Europe has changed the nature of European politics. This book seeks to address the new European politics that emerged out of this coming together of West and East. Utilizing a pan-European comparative approach the book: covers key topics, with chapters on the history, theory, institutions, parties and party systems, interest groups, systems of interest intermediation and civil society, the impact of European public policy and the emergence of a European common and foreign policy provides detailed comparisons of the national political systems across Europe, including Central and Eastern Europe and the Balkans contextualises national politics in the growing importance of European integration examines the European Union multi-level governance system approach, highlighting relationships and interactions between the global, supranational, national, regional and local levels analyses the change from modern politics, in which the nation-state was still in command of domestic politics and its own borders, to postmodern politics in which de-territorialisation, de-nationalisation and internationalisation processes have transformed the national politics of European states facilitates learning through a wide range of pedagogical features, including chapter summaries, guides to further reading, questions for revision and extensive use of maps, figures, case studies and tables. Richly illustrated throughout, this work is an indispensable resource for all students and academics of European politics. *Modern European History* brings together a unique selection of documents covering the period from 1871 to 2000. "Explores European foreign policy and the degree of European Union success in proposing itself as a valid international actor, drawing from the expertise of scholars and practitioners in many disciplines. Addresses issues past and present, theoretical and practice-oriented, and country- and region-specific"-- This introductory psychology textbook focuses on 'mind bugs' - foibles of the mind that are intrinsically fascinating and provide fundamental insights into how the mind works. It outlines the most essential research in psychology and neuroscience. The comprehensive 2005 study of rituals in early modern Europe argues that between about 1400 and 1700 a revolution in ritual theory took place that utterly transformed concepts about time, the body, and the presence of spiritual forces in the world. Edward Muir draws on extensive historical research to emphasize the persistence of traditional Christian ritual practices even as educated elites attempted to privilege reason over passion, textual interpretation over ritual action, and moral rectitude over gaining access to supernatural powers. Edward Muir discusses wide ranging themes such as rites of passage, carnivalesque festivity, the rise of manners, Protestant and Catholic Reformations, the alleged anti-Christian rituals of Jews and witches. This edition examines the impact on the European understanding of ritual from the discoveries of new civilizations in the Americas and missionary efforts in China and adds more material about rituals peculiar to women. Accessible, engaging textbook offering an innovative account of people's lives in the early modern period.
