***Contaminated Water Supplies at Camp Lejeune Nov 19 2021 In the early 1980s, two water-supply systems on the Marine Corps Base Camp Lejeune in North Carolina were found to be contaminated with the industrial solvents trichloroethylene (TCE) and perchloroethylene (PCE). The water systems were supplied by the Tarawa Terrace and Hadnot Point watertreatment plants, which served enlisted-family housing, barracks for unmarried service personnel, base administrative offices, schools, and recreational areas. The Hadnot Point water system also served the base hospital and an industrial area and supplied water to housing on the Holcomb Boulevard water system (full-time until 1972 and periodically thereafter). This book examines what is known about the contamination of the water supplies at Camp Lejeune and whether the contamination can be linked to any adverse health outcomes in former residents and workers at the base.***

**Blue Mind Aug 29 2022 A landmark book by marine biologist Wallace J. Nichols on the remarkable effects of water on our health and well-being. Why are we drawn to the ocean each summer? Why does being near water set our minds and bodies at ease? In BLUE MIND, Wallace J. Nichols revolutionizes how we think about these questions, revealing the remarkable truth about the benefits of being in, on, under, or simply near water. Combining cutting-edge neuroscience with compelling personal stories from top athletes, leading scientists, military veterans, and gifted artists, he shows how proximity to water can improve performance, increase calm, diminish**

***anxiety, and increase professional success. BLUE MIND not only illustrates the crucial importance of our connection to water-it provides a paradigm shifting "blueprint" for a better life on this Blue Marble we call home.***

**Impact of Climate Change on Water Resources Aug 17 2021** This book gives an overview of various aspects of climate change by integrating global climate models, downscaling approaches, and hydrological models. It also covers themes that help in understanding climate change in a holistic manner. The book includes worked-out examples, revision questions, exercise problems, and case studies, making it relevant for use as a textbook in graduate courses and professional development programs. The book will serve well researchers, students, as well as professionals working in the area of hydroclimatology.

***Open Water Dec 01 2022 WINNER OF THE COSTA FIRST NOVEL AWARD A NATIONAL BOOK FOUNDATION 5 UNDER 35 WINNER OF THE BRITISH BOOK AWARD FOR DEBUT FICTION “Open Water is tender poetry, a love song to Black art and thought, an exploration of intimacy and vulnerability between two young artists learning to be***

***soft with each other in a world that hardens against Black people.”—Yaa Gyasi, author of Homegoing In a crowded London pub, two young people meet. Both are Black British, both won scholarships to private schools where they struggled to belong, both are now artists—he a photographer, she a dancer—and both are trying to make their mark in a world that by turns celebrates and rejects them. Tentatively, tenderly, they fall in love. But two people who seem destined to be together can still be torn apart by fear and violence, and over the course of a year they find their relationship tested by forces beyond their control. Narrated with deep intimacy, Open Water is at once an achingly beautiful love story and a potent insight into race and masculinity that asks what it means to be a person in a world that sees you only as a Black body; to be vulnerable when you are only respected for strength; to find safety in love, only to lose it. With gorgeous, soulful intensity, and blistering emotional intelligence, Caleb Azumah Nelson gives a profoundly sensitive portrait of romantic love in all its feverish waves and comforting***

**The Road Aug 05 2020 NATIONAL**

**BESTSELLER • WINNER OF THE PULITZER PRIZE • A searing, post-apocalyptic novel about a father and son's fight to survive, this "tale of survival and the miracle of goodness only adds to McCarthy's stature as a living master. It's gripping, frightening and, ultimately, beautiful" (San Francisco Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. *The Road* is the profoundly moving story of a journey.**

***It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation. Look for Cormac McCarthy's new novel, The Passenger.***

***The Hidden Messages in Water Jul 28 2022  
In this New York Times bestseller,  
internationally renowned Japanese scientist  
Masaru Emoto shows how the influence of  
our thoughts, words and feelings on  
molecules of water can positively impact  
the earth and our personal health. This  
book has the potential to profoundly  
transform your world view. Using high-***

***speed photography, Dr. Masaru Emoto discovered that crystals formed in frozen water reveal changes when specific, concentrated thoughts are directed toward them. He found that water from clear springs and water that has been exposed to loving words shows brilliant, complex, and colorful snowflake patterns. In contrast, polluted water, or water exposed to negative thoughts, forms incomplete, asymmetrical patterns with dull colors. The implications of this research create a new awareness of how we can positively impact the earth and our personal health.***

**Shipwreck at the Bottom of the World Jun 26 2022** The extraordinary true story behind Ernest Shackleton's harrowing expedition to Antarctica on the *Endurance*—the ill-fated ship that became trapped in ice and sank to the ocean floor. Defying the odds, the crew made it back alive, bringing with them the astounding collection of photographs included in this critically acclaimed, timeless book. In August 1914, Ernest Shackleton and his crew sailed from England on the *Endurance* in an attempt to become the first team of explorers to cross Antarctica from one side to the other. Five months later and still 100 miles from land, their ship, *Endurance*, became trapped in ice. Defying the odds, the expedition survived another five months camping on ice floes, followed by a perilous journey through stormy seas to remote and unvisited Elephant Island. In a dramatic climax to this amazing survival story, Shackleton and five others navigated 800 miles of treacherous open ocean in a 20-foot boat to fetch a rescue ship.

***Shipwreck at the Bottom of the World***

***vividly re-creates one of the most fascinating adventure stories in history.
