The Mayo Clinic Book of Home Remedies Jan 24 2022  
Many common health problems can be treated with simple remedies you can do at home. Even if the steps

you take don't cure the problem, they can relieve symptoms and allow you to go about your daily life, or at least help you until you're able to see a doctor. Some remedies, such as changing your diet to deal with heartburn or adapting your home environment to cope with chronic pain, may seem like common sense. You may have questions about when to apply heat or cold to injuries, what helps relieve the itch of an insect bite, or whether certain herbs, vitamins or minerals are really effective against the common cold or insomnia. You'll find these answers and more in Mayo Clinic Book of Home Remedies. In situations involving your health or the health of your family, the same questions typically arise: What actions can I take that are immediate, safe and effective? When should I contact my doctor? Brain On Fire: My Month of Madness Jan 12 2021 'My first serious blackout marked the line between sanity and insanity. Though I would have moments of lucidity over

the coming days and weeks, I would never again be the same person ...' Susannah Cahalan was a happy, clever, healthy twenty-four-year old. Then one day she woke up in hospital, with no memory of what had happened or how she had got there. Within weeks, she would be transformed into someone unrecognizable, descending into a state of acute psychosis, undergoing rages and convulsions, hallucinating that her father had murdered his wife; that she could control time with her mind. Everything she had taken for granted about her life, and who she was, was wiped out. *Brain on Fire* is Susannah's story of her terrifying descent into madness and the desperate hunt for a diagnosis, as, after dozens of tests and scans, baffled doctors concluded she should be confined in a psychiatric ward. It is also the story of how one brilliant man, Syria-born Dr Najjar, finally proved - using a simple pen and paper - that Susannah's psychotic behaviour was caused by a rare autoimmune disease attacking her brain. His diagnosis of this little-known condition, thought to have been the real cause of devil-possession through history, saved her life, and possibly the lives of many others. Cahalan takes readers inside this newly-discovered disease through the progress of her own harrowing journey, piecing it together using memories, journals, hospital videos and records. Written with passionate honesty and intelligence, *Brain on Fire* is a searingly personal yet

universal book, which asks what happens when your identity is suddenly destroyed, and how you get it back. 'With eagle-eye precision and brutal honesty, Susannah Cahalan turns her journalistic gaze on herself as she bravely looks back on one of the most harrowing and unimaginable experiences one could ever face: the loss of mind, body and self. Brain on Fire is a mesmerizing story' -Mira Bartók, New York Times bestselling author of The Memory Palace Susannah Cahalan is a reporter on the New York Post, and the recipient of the 2010 Silurian Award of Excellence in Journalism for Feature Writing. Her writing has also appeared in the New York Times, and is frequently picked up by the Daily Mail, Gawker, Gothamist, AOL and Yahoo among other news aggregator sites.

Here humans are among the very few animal species that still exist, struggling to survive against enormous odds, but they have become small and weak, and their numbers have dwindled to almost nothing. When the aging leader of Gren's tribe decrees it is time for the old ones to go "Up," the younger are left to make their own way below. Although

the journey will not be an easy one for young Gren, he sets off on an odyssey across a perilous world populated by carnivorous plants and other evolved vegetation. But any knowledge to be gained at the terminator—the forbidding boundary between the day world and the night—might well prove worthless for the boy and the companions he amasses along the way when the expanding sun goes nova and their Earth is no more. A thrilling parable of courage, discovery, and survival, *Hothouse* is among Grand Master Brian W. Aldiss's most beloved and enduring works. Ingeniously inventive, richly detailed, and breathtakingly lush and vibrant, the doomed world and people that Aldiss creates will live forever in the minds of all those who enter this remarkable realm.

Dominion over Wildlife? Dec 31 2019 For centuries Christians believed that God granted humanity dominion over the animal kingdom, meaning that we had a moral right to kill, manage, and eat animals including wildlife. Recently, however, environmental and animal rights activists have assaulted this traditional perspective. They argue that dominion as expressed in meat eating and

hunting has resulted in species extinction and environmental degradation. Christian Animal Rights (CAR) activists suggest that the church must reevaluate its traditional beliefs in light of the fact that God's original creation was free of human on animal violence. God, they argue, did not want man's dominion to be expressed through trapping, killing, and eating of animals. These violent activities only came about after the Fall, as God condescended to our hardness of heart. CAR activists point to Christ's sacrificial work of reconciliation as a model for modern Christian behavior: as Christ sacrificed for us, we should avoid eating meat and hunting as ways we can participate in Christ's non-violent work of reconciling creation to himself. In this book, Stephen Vantassel investigates the biblical, ethical, and scientific arguments employed by the CAR movement concerning human-wildlife relations. In this regard, the book engages in practical theology by addressing several important questions: How should Christians treat our wildlife neighbors? Has the Church been wrong in its understanding of human dominion? Does God want Christians to avoid hunting, trapping, fishing, and to adopt a vegetarian lifestyle? This book provides answers to these questions by detailing a theology the author calls, Shepherdism.
